Offer for the initial configuration of Magento Shop

Initial configuration of Magento Shop.

Magento is one of the most modern and flexible professional eCommerce solutions available today. The software comes complete with interesting features and builds upon the ZEND-Framework. Customizations made by the customer are transferred in Modules embedded in the program's core. With this it is possible, for instance, to install updates from Magento without the changes and enhancements made by the customer being overwritten. Additionally, Magento Shop is equipped with a search engine friendly program structure.

Our offer includes the following services:

Basic configuration of the shop. Setup of the mail server. Incorporation of the firm's information and logo as well as design concept. Basic filling of the shop with the PIM product data, e.g. from the JTL Wawi. Setup of the payment and delivery method. One-hour online orientation through TeamViewer. In order to successfully implement this, we require your core

data, a hosting package, a domain and information of the firm such as GTC's, bank details, etc.

We offer this initial configuration to you for

2500,- € (subject to VAT)

Hosting of your Magento Shop for 199,- € a month (min. term of 36 months) incl. half-year security update. Licenses are not included in the offer. These must be purchased separately as required.

Additional Services:

A domain for your shop as well as further payment and/or delivery methods, Trusted Shops certification. Logo or design concept through the PLAN PRO SAAS Datacenter GmbH.

All prices subject to VAT
